------------------	-------------------------	-------------------	--------------------	-----------------

CONTENT: Victim registration and notification history database records are stored off-site for the Wisconsin Department of Corrections (DOC) by Appriss, Inc. a company specializing in victim information services. Three computerized application have been developed by Appriss, Inc. for Wisconsin's Office of Victim Services and Programs (OVSP). All three applications use the victim registration data and are also supported by DOC offender data, which is extracted from DOC offender-based systems on a daily basis and transferred to Appriss, Inc. A description of the three applications is provided, below:

VINE - a phone-based service where victims, Victim/Witness Coordinators, and OVSP staff may receive current information on an offender's status and location. VINE also provides information to the general public regarding offenders required to register with the Sex Offender Registry. VINE stands for Victims Information and Notification Everyday.

VOICE - a customized web-based system where victims, victim/witness coordinators, OVSP staff, and others (e.g., DOJ, district attorneys, DOC Monitoring Center, Parole Commission, DOC Sex Offender Registry Program, and DOC Cashier's Unit) may receive current information on an offender's status and location. Victims also have access to their personal contact information and notification preferences. VOICE stands for Visual Offender Information Center.

VINEWatch - a web-based system for OVSP staff use. VINEWatch is the administrative application that replaced PENS (Parole Eligibility Notification System, noted in RDA #124A), a computer application hosted at DOC from 1989 through the rollout of VINEWatch in Phase 2 of the Victim Web site project in December 2003). VINEWatch allows OVSP staff to enter and store victim registration information and to generate notification letters regarding specific offender events, and to retain a history of victim notification letters.

PURPOSE - The victim web site and database allows victims to receive notification letters, or to inquire, either by phone or via the internet, about the current status of an offender under WI DOC supervision and to register for notification upon a change in status.

NOTE - Existing victim registration and notice history data was converted to this system from the PENS system, in addition to copying the data to tape for storage at the Department of Administration (DOA) DET Tap library.

Records will be deleted when a request is made by the victim to remove their information from the system, or if the OVSP verifies that the enrolled victim is deceased.
