Both RDA AMD00026 and ADM00027 were considered for these records; however, the DOC determined that these Research Projects Case Files are not Program/Policy Impact nor are they Internal or Routine.

The DOC Research Projects RDAs exist and are renewed as separate RDAs due to the nature of the records that researchers may have access to. These are often times research that may be published by professionals within a specific or multiple disciplines. We have had these RDAs in the past and prefer to have separate retentions for the different aspects of these research projects. The DOC does not believe that Research Projects that have been denied/withdrawn, no protocols returned or the log needs to be sent to the Wisconsin Historical Society or retained the same length of time -- therefore the need for separate RDAs. Historically inmates are the subject of studies in many disciplines.

Retention Justification: These records may have business or historical value if the research project is approved and completed. The seven (7) year in house retention provides the DOC with access to these records in the event of research finding publication and any items that would arise from said research. The DOC feels this retention is adequate for business purposes.

|-------------------------|--|---------------------|--------------------|-----------------|

CONTENT: The records in this series are the exception request(s) from an employee based on the Fraternalization Policy outlined in Executive Directive 16. This policy was developed to address in a consistent fashion any conflicts of interest that may arise between employees and the offenders they supervise. Relationships between Department of Corrections (Department) employees and persons under the supervision or custody of the Department may compromise the ability of employees to carry out their duties and responsibilities. In addition, the Department has the responsibility to protect its inmates, and offenders from improper relationships that may create conflicts of interest or felony prosecution. The policy outlines a procedure for employees to seek exceptions.

PURPOSE: When an employee reports a potential conflict or violation, the supervisor must obtain a request for an exception from the employee. The supervisor will forward the request along with any recommendations to the appropriate division administrator for preliminary approval or denial. The request is then sent to the Secretary's office for a final decision. Exceptions are granted only by the Department Secretary (or designee) after review of specific circumstances by supervisors and division administrators.

The Fraternalization Policy requires employees to:

- Inform supervisors of any current relationship that may present possible conflicts of interest. Before beginning any relationship that may violate the policy, an employee must inform the supervisor.
- Report unanticipated, non-employer-direct contacts with inmates or offenders.
- Ensure that any unanticipated contacts are brief and business like.
- Request exceptions to the policy through the supervisor.

Supervisors must report the specifics of any employee contacts and exceptions requests to the appropriate division administrator. The Secretary (or designee) will review all requests and either grant or deny exceptions.

Supervisors shall ensure that each employee has read the Department Fraternalization policy and the signed Acknowledgement of DOC Fraternalization Policy (Form DOC-1281) is placed in the personnel file and will be maintained according to the Human Resources General Records Schedule.

These records are to be maintained at the division level. All other copies are duplicates and can be destroyed when no longer needed or according to the Human Resource General Records Schedule for Official Personnel File or Supervisor Files.

Retention changed from Event+ 0 to Event+ 8 Years to match the Personnel File records retained under Human Resource General Records Schedule RDA HR000190 Official Personnel File.

The purpose of the Inmate Complaint Review System (ICRS) is to afford inmates in institutions and centers a process by which grievances may be expeditiously raised, investigated and decided. The ICRS purpose is:

- To allow inmates to raise, in an orderly fashion, issues regarding department policies, rules, living conditions, and employee actions that personally affect the inmate or institution environment, including civil rights claims.
- To provide the department an opportunity to resolve the issue before an inmate commences a civil action or special proceeding. To encourage communication between inmates and employees.
- To review and explain correctional policy or practice to inmates and employees. To identify errors and deficiencies in correctional policy or practice.

These records host no court system appeals. It is the internal complaint system within the Department of Corrections. Inmate complaints are initiated locally at each adult institution. Rejected complaints are completed at the Institution Complaint Examiners (ICE) level and are appealable by the appropriate reviewing authority (i.e. warden or bureau director of health services or correctional enterprises). That decision is final. The remaining complaints are addressed at the ICE level with a recommendation that is forwarded to the appropriate reviewing authority (RA). The RA renders the final decision on the inmate complaint. Inmates may appeal a complaint decision to the Corrections Complaint Examiner (CCE). The CCE makes a recommendation on the appealed complaint that is forwarded to the Office of the Secretary (OOS). The QOS designee renders the final decision on the inmate appeal.

The Inmate Complaint Tracking System (ICTS) is an automated system used by ICE, the RA, the CCE, and OOS in processing, tracking, addressing and communicating decisions regarding inmate complaints.

 RDA FAC00001
 RDA ADM00008

The DOC has considered the Administrative General Records Scheduled - RDA-ADM00023 Internal Policy and Procedures and found that this record series is not long enough for our business and legal needs.

Justification for retention: The DOC has a few records series it retains surrounding offender/inmate records, which have 60-year retentions. These internal policies and procedures may have an effect on programs, policies, and procedures that were followed during a specific timeframe, therefore we request to retain the policies in place at the time, to ensure reference if needed. The 60-year retention was derived as the length of time of the longest record series related to offender/inmate program, treatment and other items.

The DOC considered ADM00030, however this record series is for "Appointed Staff or Equivalent Positions" with the records transferred to the Wisconsin Historical Society. As there is no general records schedule for a Subject File record series for those offices, bureaus, and program, it has been determined that the DOC is in need of a record series for this type of record. 00240000. MOVEMENT OF POPULATION **EVT+100** **DEST** **Y**

This record series consists of logs of all offenders admitted and released at each facility. The forms include but are not limited to: DOC-733 Movement of Population, DOC-910 Movement of Population, and IPTR154 Movement of Population.

These logs contain offender names, DOC numbers, date of movement, time of movement, sending location, receiving location, reason for movement (court, medical, transfer to and from another facility).

These records are utilized to document and identify trends in inmate population. Information identified would include increases and decreases in inmate population, inmate demographics and committing offenses.

Retention: The life span of a person can be up to 100 years and the department has offender's that receive sentences of that length so in order to allow verification of custody in a prison, the movement of population is needed as a backup to our data systems. Our data systems only date back to 1983 and the extended retention period ensures the retention of prison custody records related to any person who falls within the 100-year life span. Per Wis. Stat. §16.61(3)(b) these files require long-term retention.

Lifecycle Language: The official record in this series may be transferred to, or maintained in, electronic/digital format for the full retention period. To comply with Wis. Stat. § 16.61(7) and 137.20 for authenticity, accuracy, and accessibility the original input documents may be imaged or reformatted and subject to review, to ensure the images are electronically stored and the quality of these images is acceptable. Upon verification of the quality and retention of the electronic images, the input record will be destroyed confidentially.

Stat. § 980 sex offender case files are retained for reference if the youth commits another sex offense at some future date beyond the 7-year retention period of a non-sex offender case.
